Navionics Cards

Navionics Cards

Lowrance no longer allows data to be saved to Navionics SD cards because the data on the card could be corrupted. In order to preserve the Navionics card data, any unit with version 2.20 or higher will prevent recording of data. This affects the following units:

- LCX 113c
- LCX 112c
- LCX 38c
- LCX 37c
- LCX 28c
- LCX 27c
- LMS 520c
- LMS 522c
- LMS 525c
- LMS 527c
- GM 9200c
- GM 8200c
- GM 7200c
- GM 5200c
- GM 5300c
- GM Baja 840c
- GM Baja 540c

As a result, users will not be able to save data on 5" products when using Navionics cards. Users may still save screen captures or record sonar data to the unit while using a Navionics SD card if they have a hard drive unit or unit with a second card slot like the following:

- LCX 113c
- LCX 112c
- LCX 38c
- LCX 37c
- LCX 28c
- LCX 27c
- GM 9200c
- GM 8200c
- GM 7200c
- GM Baja 840c
